Subject: House bill 6962

Data from the Centers for Disease Control and Prevention (CDC) indicate that nationally since 1975, the annual number of firearm accident deaths among children ages 0-14 has declined by 87 percent, even as population, the number of gun owners and the number of guns owned have risen substantially. Their reports also indicate that children are more likely to suffocate (27%), drown (17%), be accidentally poisoned (2.2%), or perish from an accidental fall (1.6%) and are as likely to die in a non-traffic bicycle and tricycle accident (1.5%) as they are in a firearm accident (1.5%).

EVERY HOUSE has different needs for their rights to defend themselves. Storage of firearms is part of that.

I urge you to VOTE AGAINST House Bill 6962

Thank you for your time

Kyle Buckley
